

Weary Dunlop Foundation

Annual Report 2019

Promoting Medical Research for Those who have Served

About the Foundation

The Sir Edward Dunlop Medical Research Foundation was created in 1985. It has made a significant contribution to medical research aimed at improving the health and wellbeing of Veterans and their families.

Sir Edward Dunlop was the driving force behind the formation of the Foundation as well as its inaugural Patron, and a prolific fundraiser.

The Foundation is grateful for the support it receives from ex-service organisations, the Department of Veterans' Affairs and community-minded companies and individuals.

The research funded by Weary Dunlop has materially expanded Australia's medical research capability, leading to discoveries and improvement in the treatment and prevention of many illnesses that particularly affect the ex-service community.

As Sir Edward himself envisaged, this research has also had a significant impact on the broader community.

The Foundation is proud to have as its Chief Patron the Governor-General of Australia, His Excellency General the Honourable David Hurley AC DSC (Retd), and Patron Mr Hugh Morgan AC

Our Promise

To pursue Sir Edward Dunlop's commitment to improve the health care and general wellbeing of those who serve their country, their families, and the wider community, and to promote his example of compassion, leadership, and innovation among young and older Australians

Our Objectives

We progress Sir Edward Dunlop's legacy by:

- supporting research into medical conditions prevalent among ex-servicemen and women and their families
- developing the nation's medical research capability by supporting new and emerging medical researchers

We increase understanding of this inspiring Australian and his outstanding contribution to our heritage by:

- educating students about his life and achievements
- conducting commemorative services to honour the service and sacrifice of Sir Edward Dunlop and his fellow Ex-prisoners of War

"The impact of the stress and strain of war upon the physical and mental health of veterans and upon ageing processes is a vital area of research, with ultimately immense application to the community as a whole"

Sir Edward Dunlop

About Our Founder

Sir Ernest Edward 'Weary' Dunlop is one of the extraordinary figures in Australia's history. His name and deeds are associated with compassion, courage, leadership, steadfastness and hope.

Ernest Edward Dunlop was born on 12 July, 1907 at Wangaratta, Victoria, Australia.

He was a good student and at 16 years of age, had completed his studies at Benalla High School.

In 1927 he travelled to Melbourne where he completed a pharmacy course, graduating top of his class. In the same year, he began to study medicine at The University of Melbourne, excelling in his studies and also in sport. He played with 'The Wallabies', Australia's national rugby team, as well as becoming the University's champion boxer. Graduating from Melbourne University in 1934 with his medical degree (MB BS), he was granted a Fellowship at the Royal Australasian College of Surgeons.

At the outbreak of The Second World War in 1939, he immediately enlisted and was posted to an Australian Unit in Jerusalem, Palestine.

Weary continued his service with the Royal Australian Army Medical Corps in Crete, Greece, as well as the Middle East. In 1942 he was sent to Java, Indonesia. In March of that year, the Japanese captured Weary's hospital and so he became a prisoner of war (POW). All POWs were taken by ship to Singapore and from there some, including

Weary, were railed in crowded rice trucks and sent to Thailand.

The Japanese utilised these men to build a continuous strategic rail line between Burma and Siam. Over 400 kilometres long, this ambitious Japanese engineering project became known as 'the Railway of Death' – it has been estimated that, including POWs and native labour, the construction of this railway cost 100,000 lives.

Weary led the first Australian group to arrive in Thailand to work on the Railway. In his dual capacity of Commanding Officer and Surgeon, he had the care and responsibility for over 1,000 men. This group became known as 'Dunlop Force' or 'Dunlop's Thousand'.

Weary's medical skills, compassion and dedication to duty inspired his fellow POWs. He displayed extraordinary courage in attempting to improve the harsh living and working conditions imposed by his captors. With scarce medical supplies and lack of proper instruments, improvisation was the order of the day and often made the difference between death and survival.

Weary used his position as a doctor and Commanding Officer to protect his men. Having the awesome responsibility of deciding who was fit enough for work and who could remain behind to perhaps survive, he would often stand up to the Japanese soldiers, frequently with dire consequences for himself.

In 1946, three weeks after he returned to Melbourne, Sir Edward married his sweetheart,

Helen Ferguson, at the Toorak Presbyterian Church; they had been engaged since 1940. Their first child, Alexander Boyd, was born on 5 August 1947 and their second son, John, was born in June 1949.

In the post-war years, Sir Edward continued his distinguished medical career. In 1969 he was knighted in recognition of his contribution to medicine. In 1976 Sir Edward Dunlop was honoured as Australian of the Year. He was very active in the ex-service community and was awarded an honorary life membership of the Returned and Services League in 1979.

Sir Edward became an ambassador for Australia, building bridges of friendship wherever he travelled in Asia. In Asia, particularly in Thailand, he was revered. He often travelled to Vietnam, Japan and Moscow, easily and graciously surmounting all cultural barriers.

On 2 July 1993, Sir Edward Dunlop passed away. A state funeral was held at St Paul's Cathedral. An estimated 10,000 people lined the streets of Melbourne for his funeral. A wonderful eulogy was delivered by former High Court Justice and Governor General Sir Ninian Stephen.

From The Chair

On behalf of the Directors of the Weary Dunlop Foundation I have pleasure in presenting the 2019 Annual Report to Foundation members and stakeholders.

A strategic planning day held in February helped the Board to develop its short, medium, and longer term aspirations for the Foundation. Directors identified four broad areas requiring focus – Profile, Funding, Making a Difference for Veterans, and Governance and Administration. This led to productive deliberations around some of the fundamentals of our Mission – ranging from greater engagement with younger generation Australians, to more imaginative funding strategies, to a better targeted research effort, to Board operations and administrative support.

The process also encouraged us to re-commit to the Weary Dunlop legacy - in terms of promoting his personal values and characteristics, improvement of Veteran and community wellbeing, and supporting early-career medical research capacity in this State.

All very challenging, but equally exciting.

The Board re-affirmed its position to keep annual research expenditure at over 80% of income. In addition to our funding contribution to the Melbourne University Dunlop Associate Professor position based at Austin Health, we maintained our annual research outlay at six grants of \$20,000 each, including one specifically for Veterans' mental health conditions. From another large field of submissions, Directors were extremely impressed with the applications recommended by our Medical & Scientific Committee and were pleased to present the grants at our June meeting. Details of the recipients and their projects appear later in the Annual Report.

Fred Cullen OAM is congratulated by daughter Mrs Maria Geary on receiving his Life Governorship from the Foundation

The year's highlights again included the annual commemorative service at Weary's statue in St Kilda Road which continues to grow, and the Dunlop Symposium held as part of Austin Health's Research Week. In addition, we were pleased to join Benalla P-12 College (Sir Edwards's alma mater) at the opening of their new Weary Dunlop Education Centre.

After more than 20 years' outstanding service in the Dunlop cause, World War 2 Veteran and Board member Fred Cullen was recognised with the awarding of Life Governor at a ceremony in September. Earlier in the year we also welcomed new DVA Deputy Commissioner, Ms Jenny Cotton, who replaced Ms Leonie Nowland in that role, and we were happy to see the return of former Director, Mr Bruce Coward, representing Melbourne Legacy.

More recently, the Foundation Board was deeply saddened to learn of the passing of Life Governor Mrs Mary Tanner, and of stalwart Mrs Enid McCauley, widow of founding Treasurer George McCauley.

In closing I wish to thank our many supporters and donors, and pay particular regard to:

- Professor Jeffrey Zajac and the members of the Medical and Scientific Committee, and to Ms Debbie Gillespie;
- Rob Winther and Siobhan Hodgins of the Veterans Liaison Unit at Heidelberg Repatriation Hospital;
- Minute Secretary, Mrs Kath Fidler, and the helpful staff at DVA; and
- the executive and members of the Foundation's Board for their constant and committed promotion of the Weary Dunlop legacy.

Medical & Scientific Committee Report

I am delighted to report on the activities of the Medical & Scientific Research Committee. The major function of this committee is to select an appropriate number of high quality grant proposals for funding. This process is absolutely dependent on the members of the Medical & Scientific Research Committee who score the applications for grant funding and we thank them for their time and expertise. This year there were 26 grant applications submitted, of which 6 were selected for funding. As always, our focus is on common diseases affecting veterans, their dependents and those serving in the armed forces and in the general community. The Foundation focusses on common, chronic diseases which effect both veterans and members of the general community.

The aim of the Dunlop Foundation grant funding is to provide seed funding to allow research ideas to develop into larger proposals suitable for funding by the NHMRC or other national funding bodies. This year 6 grants of \$20,000 each were awarded, totalling \$120,000 in research funding from the Foundation. Details of the successful recipients and their projects are included on the following page.

The Medical and Scientific Research Committee organised a very successful Symposium as part of the Austin Hospital Research Fest. There were over 80 clinicians, scientists and members of the Austin and Dunlop Boards in the audience who listened to 3 very interesting presentations from past Dunlop grant recipients. Dr Alex Hewitt, from the Clinical Genetics Unit, Centre for Eye Research Australia and past grant recipient in 2017 presented his research on “Single cell transcriptional profiling of blinding glaucoma”. Dr Yet Hong Khor, from the Department of Respiratory and Sleep Medicine at the Austin and grant recipient in 2018 presented her research on “A pilot randomised controlled trial of ambulatory oxygen versus air via portable concentrator in fibrotic ILD”. Finally, Professor Mathis Grossmann, past grant recipient in 2008 and Head of the Men’s Health Unit in the Endocrinology Centre for Excellence at the Austin, presented his research “Testosterone and men’s health”. All presentations were well received by the large audience. The Symposium this year was again considered very successful by all who attended.

The Centre for Research and Education in Diabetes at the Repatriation Hospital had a very productive and successful year in 2018-2019. We achieved the following:

GRANTS: JDRF Leadership *Future Research Leaders Program: EMCR Group Proposal for Pilot Study: Regulatory T Cells and Kidney Disease Progression in T1D* CIA Elif Ekinci, \$100, 000.

MRFF (Medical Research Future Fund) - Rapid applied Research Translation Program, CIA Elif Ekinci, \$275,000, Dr Priya Sumithran, NHMRC Investigator Grant \$522,825.

CLINICAL TRIALS: Centre for Research and Education in Diabetes and Obesity undertook >10 Drug trials and 7 investigator-initiated studies.

PUBLICATIONS: Centre for Research and Education in Diabetes and Obesity published over 30 papers in leading diabetes, obesity and metabolism international journals.

SUPERVISION & MENTORING: The following PhD students are currently supervised by myself in the department in the fields of diabetes and obesity: Dr Sara Baqar (Endocrinologist), Dr Jas-mine Seah (Endocrinologist), Dr Irina Churilov (Rehabilitation Physician), Dr Audrey Eer (Endocrinology advanced trainee), Victoria Ntouma, Dr Geetha Theverakalam

Diabetes and obesity are leading causes of cardiovascular disease. With increasing age, the prevalence of diabetes and obesity increases. Following a diagnosis of diabetes, after a period of more than 10 years, there is risk of development of complications and in particular the risk of development of kidney disease and cardiovascular disease. These metabolic diseases, including their complications, affect many Veterans and their families.

Dunlop Senior Research Fellow Report

The following post doctorate research fellows are also working with us in the department: Dr Priya Sumithran – Endocrinologist, Dr Sarah Price- Endocrinologist, Dr Niloufar Tourkamani- Endocrinologist. We have supervised 5 University of Melbourne Scholarly Selective Research students to completion in 2018 and 2019.

PRESENTATIONS:

The group presented > 30 times at leading national and international diabetes, obesity, endocrinology, metabolism Scientific Meetings.

MEDIA/COMMUNITY PARTICIPATION:

ABC News Channel, in depth interview on diabetes, July 14, 2019, Launch of the National Diabetes Week at Austin Health with Diabetes Australia “It’s about time” campaign, Jul 13 2019, TV coverage at ABC, SBS, Channel 9 and Channel 10, The Limbic, 14th June 2019, Hidden diabetes revealed in haematology and oncology patients, Healio, Endocrine Today, March 13th 2019, “Inpatient diabetic ketoacidosis more frequent with SGLT2 inhibitor use, The Limbic 29nd March 2019, “Why it’s safe to relax glycaemic targets in ICU”, Melbourne Medical School documentary “It started in the Sutherland” , 23rd November 2018, The Limbic, Endocrinologists report their early clinical experience with flash glucose monitoring.

Assoc Professor Elif I Ekinci MB BS, FRACP, PhD

Weary Dunlop Swinburne Scholarship Essay 2019

The Weary Dunlop Scholarship, made possible through the co-operation of Swinburne University and the City of Stonnington, is awarded annually to a student of Swinburne University with a history of commitment to public and community service.

Sir Edward “Weary” Dunlop Holly Barbour

Ernest Edward ‘Weary’ Dunlop, born the 12th of July 1907, is recognised as a well-respected Australian man who proudly served his country during the Second World War. It is widely agreed that Weary is one of Australia’s most iconic war veterans. Weary is remembered for his compassionate medical care and leadership of the prisoners of war, those who were captured by the Japanese in World War 2.

He treated those soldiers as though their welfare was the most important thing to him, and on a number of occasions he put his own life on the line to defend his fellow POWs against cruelty and brutality by the Japanese. All of the prisoners suffered terribly primitive conditions, and Weary was revered for his care of the ill and his readiness to put others first despite being unwell himself. Because of this he was an inspiration to many of his peers’ survival.

Returning from war, Weary made a priority of fostering the wellbeing of the returned soldiers. He assisted them in claiming government pensions and worked to influence

governments on their behalf. Most widely recognised was his unwillingness to regard his former captors, the Japanese, with hatred. He is quoted as having said “that all men are equal in the face of suffering and death”.

Whilst a renowned Surgeon in Australia and Europe, Weary’s philanthropic outlook underpinned all of his career ventures. His numerous honours and awards recognised his outstanding achievements as well as the respect of his peers.

Ms Holly Barbour accepts the award from Professor Sarah Maddison, Pro Vice-Chancellor, Academic Innovation and Change, Swinburne University.

Weary’s selfless determination to improve the lives of others was no better proven than when he had the opportunity to escape the perils of war at the time that Java fell to the Japanese in 1942. He was well aware of his fate, but he refused to abandon his patients.

His entire life was dedicated to the service of others, but he was reluctant to focus on his own achievements, saying that he was “only one among thousands”. He is a true example of altruism; most diligently working towards a better outcome for others.

Weary very actively supported many social, educational and sporting associations. He devoted himself to the health and well-being of others. His tireless community work had a profound impact on the people of Australia and Asia.

He was heroic, inspirational, passionate, but most of all, modest. He gave his country a “vision of courage, compassion, sacrifice and service”. He was a man of deep personal integrity, and perhaps the Mission Statement of the Freemasons, of which he was an active member, was the truest reflection of his beliefs: to promote a way of life that binds like-minded men in a world-wide Brotherhood that transcends all religious, ethnic, cultural, social and educational differences; by teaching the Great Principles of Brotherly Love, Relief and Truth; by the outward expression of its concern, and by finding ways in which to serve God, family, country, neighbours and self.

Honorary Treasurer's Report

The Net Assets of the Foundation decreased during the year ending 30 June 2019 by a net \$60,967 reducing the value of Net Assets to \$1,520,188 (2017/18 \$1,581,155) leaving the Foundation's finances in great shape to continue its work in 2020. The Operating Deficit for the financial year was \$81,681 (\$80,391 in 2017/18).

The major factors leading to the result were:

- Investment income decreased year on year by \$22,708, down to \$93,830,
- Donation/bequest income increased over last year by \$19,859, up to \$66,494,
- Research grants/research fellow contribution remained the same as the previous year at \$205,000,
- Operating costs remained the same as the previous year at \$37,000.

It was pleasing to see charitable donations increase over 2017/18 as that year was the lowest for several years. Despite some initiatives by the Foundation to attract corporate donations very little response was received. Donations and bequests from families and individuals sympathetic to the Weary Dunlop Foundation cause are important and much appreciated and further fund-raising efforts in this area will be mounted in the coming year. The focus will also look to the veteran community and the retirement/care organisations in 2019.

It was a difficult year for managed investments but skilful monitoring by our fund consultants resulted in only a relatively small decrease in the investment valuation (of \$57,995 down to a balance at 30 June 2019 of \$1,495,808) after drawings to fund the grants and research fellow contribution. The Foundation's investment fund is managed by Shadforth Financial Group, part of IOOF. The investment funds are managed with the objective of producing the best return within a safe risk profile. The Foundation actively monitors the funds invested which are reviewed at each month's board meeting and receives quarterly performance reports from Shadforth.

The major operating costs this year were managed investment consulting fees of \$18,047 and \$3,885 for the annual service in July. All other overhead costs were kept to a minimum and closely controlled. All board members are volunteers and none claim expenses. No monies are paid to fund raisers.

It was very satisfying to again in 2018/19 issue six medical research grants of \$20,000 each to emerging researchers at various medical institutions which will benefit veterans as well as the general community. The Foundation also contributed \$85,000 to the University of Melbourne for the position of Dunlop Senior Research Fellow based at Heidelberg Repatriation Hospital. Dr Elif Ekinci's activities report to the Foundation is presented earlier in this Annual Report. The Foundation's aim is to make valuable contributions to research every year, increasing the value of grants when possible, recognising the increasing costs of medical research.

Thanks to my fellow board members for their assistance during the year and to Cummings Flavel McCormack (Mazars) who provided audit services on a reduced cost basis.

Dennis Payne B. Econ. CPA

INDEPENDENT AUDITOR'S COMPLIANCE AUDIT REPORT

To the directors of The Weary Dunlop Foundation

Opinion

We have audited the compliance of The Weary Dunlop Foundation with the *Public Ancillary Fund Guidelines 2011* contained within the *Tax Administration Act 1953* ("Guidelines") for the financial year ended 30 June 2019.

In our opinion, in all material respects The Weary Dunlop Foundation has complied with the *Public Ancillary Fund Guidelines 2011* contained within the *Tax Administration Act 1953* for the financial period ended 30 June 2019.

Basis for Opinion

This compliance audit report has been prepared for the directors of The Weary Dunlop Foundation in accordance with the Guidelines. We disclaim any assumption of responsibility for any reliance on this report to any person other than the directors, or for any purpose other than that for which it was prepared. We are independent of the fund in accordance with the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 Code of Ethics for Professional Accountants (the Code) that are relevant to our audit of compliance with the Guidelines. We have also fulfilled our other ethical responsibilities in accordance with the Code.

Inherent Limitations

Because of the inherent limitations of any compliance audit, it is possible that fraud, error or non-compliance with laws and regulations may occur and not be detected. An audit is not designed to detect all weaknesses in the compliance measures as an audit is not performed continuously throughout the financial period and the audit procedures performed on the compliance measures are undertaken on a test basis.

Any projection of the evaluation of the compliance measures to future periods is subject to the risk that the compliance measures may become inadequate because of changes in conditions or circumstances, or that the degree of compliance with them may deteriorate.

LIABILITY LIMITED BY A SCHEME, APPROVED UNDER THE PROFESSIONAL STANDARDS LEGISLATION

Directors' Responsibilities

The directors of The Weary Dunlop Foundation are responsible for the design, documentation, operation and monitoring of compliance with the Guidelines and the adequacy of compliance measures, including the relevant internal control systems, policies and procedures, and compliance therewith.

Auditor's Responsibilities

Our responsibility is to express a conclusion on compliance with the Guidelines by The Weary Dunlop Foundation. Our audit has been conducted in accordance with applicable Standards on Assurance Engagements (ISAE 3000 *Compliance Engagements*) to provide reasonable assurance regarding the compliance with the Guidelines. Accordingly, we have performed such tests and procedures as considered necessary in the circumstances. Our procedures included obtaining an understanding of the compliance measures and examining, on a test basis, evidence supporting the operation of these compliance measures. These procedures have been undertaken to form a conclusion whether, in all material respects, the directors have complied with the Guidelines during the financial period ended 30 June 2019.
